Designed by Anker Studio

Anker Studio was founded by Danish designer Jonas Birkebæk Poulsen, who grew up with design from an early age, making it an integral part of his daily life. Growing up with a father who worked as a designer for LEGO, the idea of creating something from nothing was always close at hand. This early immersion made design feel second nature. It shaped not just his interest, but the way he sees the world today – all the details, possibilities, and stories waiting to be told.
