

Hills WP05 Recessed Indoor Piezo Siren

Hills WP05 Recessed Indoor Piezo Siren

SKU WP05-EAA-ISPFM

The **Hills WP05** is a compact recessed indoor piezo siren for compatible hardwired alarm systems. Its low-profile ceiling installation provides a discreet appearance while delivering a powerful 106 dB audible warning.

- 106 dB internal alarm output
- Hardwired alarm-panel connection
- Recessed flush ceiling installation
- Approximately 73 mm diameter × 55 mm deep

Best For

Adding a discreet, high-output internal warning device to a compatible hardwired alarm system.

Recessed Indoor Piezo Siren

The Hills WP05 is a compact internal piezo siren designed for recessed ceiling installation. It connects by cable to a compatible alarm control panel and produces a high-frequency audible warning when the alarm is activated.

Key Features

- Recessed indoor piezo alarm siren
- High-frequency oscillating warning tone
- Sound output of 106 dB
- Hardwired connection to the alarm control panel
- High sound output with low current consumption
- Low-profile flush ceiling appearance
- Compact design for residential and commercial interiors

What Is Included

- 1 × Hills WP05 recessed indoor piezo siren

An alarm control panel, cabling, backup battery, mounting consumables, installation and other alarm accessories are not listed as included.

Alarm System Compatibility

The WP05 is intended for connection to a compatible hardwired alarm control panel siren output. The available specifications do not state its operating voltage or exact current draw, so these requirements must be confirmed before connection.

This is a panel-powered wired siren and cannot operate as a standalone or wireless warning device.
